HEALTH DEPARTMENT,
8, CLEVELAND PLACE EAST,
BATH.

*To the Chairmen and Members of the
Bathavon, Keynsham, Frome Urban and
Frome Rural District Councils.*

LADIES AND GENTLEMEN,

The incidence of infectious disease during the year followed much the same pattern as that of the previous year, and the actual figures for many of the diseases remained more or less constant. It is all the more significant, therefore, that not a single notification of poliomyelitis was received from any part of the area. While it is perhaps unwise at this stage to assume that this very gratifying state of affairs is due entirely to the vaccination scheme so recently undertaken one can be excused a feeling of satisfaction that all the extra work done in respect of this disease has not been in vain and that it is already producing the results hoped for.

The birth rate showed a reduction on last year's figures as did also the death and infantile mortality rates.

In response to a request from the Ministry of Health the Infantile Mortality Rate has been supplemented by the following rates:—

- (1) Neo-natal (deaths under 4 weeks per 1,000 total live births).
- (2) Early neo-natal deaths (deaths under 1 week per 1,000 total live births).
- (3) Peri-natal (Still births and deaths under 1 week combined per 1,000 live and still births).

It is with grateful thanks that I acknowledge once more the continued co-operation received from the members and staffs of the councils of my constituent authorities during the year. I should also like to pay tribute to Dr. Mann, the Director of the Public Health Laboratory, Bath, for much helpful advice and practical assistance.

Yours faithfully,

R. H. G. H. DENHAM.

INFECTIOUS DISEASES

SCARLET FEVER

The reduction in notifications for three successive years was not continued in 1959, the number of cases moving up from twelve to forty-three. In only one instance, however, was admission to hospital considered to be necessary.

MEASLES

As during the previous year, which was an inter-epidemic year, notifications of measles continued steadily throughout the area, 597 being received compared with 564 for the previous year. In the past epidemics of this disease have occurred roughly every two-and-a-quarter years and it will be interesting from the epidemiological point of view, therefore, to see what the incidence will be in 1960.

WHOOPING COUGH

Last year's increase in the number of cases of whooping cough was not repeated this year. Notifications received fell from 186 to forty-nine.

PNEUMONIA

Thirty-three cases of pneumonia (ten influenzal) were notified compared with thirty-seven (eight influenzal) the previous year. Three only were admitted to hospital compared with fifteen for the previous year.

DIPHTHERIA IMMUNISATION

Preventive inoculation against diphtheria lost little of its popularity during the year and a satisfactory proportion of children were protected. The majority received the injections from their own doctors who, in the main, favoured the triple vaccine which gives protection against diphtheria, whooping cough and tetanus. A considerable number of parents however, chose to have the booster dose given at school when their children entered at the age of five. This amount of protection appears to be adequate as the area continued to remain free from diphtheria.

ERYSIPELAS

Two cases of erysipelas were notified compared with four for the previous year.

TUBERCULOSIS

The figures for this disease were almost identical with those for last year, forty (thirty-six pulmonary, four non-pulmonary) as against forty-one (thirty-six pulmonary, five non-pulmonary).

The B.C.G. vaccination for school leavers has now become an established practice during the first quarter of the year. The numbers dealt with have increased each year and it is to be hoped that the results finally achieved will justify the extra work which this service has necessarily entailed.

MASS RADIOGRAPHY SERVICE

A Mass Radiography Unit of the South West Regional Hospital Board visited the Fear Institute, Keynsham, during the period November 30th to December 4th, 1959.

The attendances were:—

<i>Male</i>	<i>Female</i>	<i>Total</i>
458	521	979

FOOD POISONING

Seven notifications of food poisoning were received during the year compared with four during 1958. Three were individual cases of salmonella infection which occurred in widely separated parts of the area and from which there were no secondary cases. The other four constituted a small outbreak which followed the eating of pigs tongues infected with staphylococcus aureus. The symptoms were quite severe, one case being admitted to hospital. All eventually made a complete recovery.

POLIOMYELITIS

It is with considerable satisfaction that one is able to report complete freedom from this disease during the year. Not a single notification was received from any part of the area. While it is much too early to be certain that this happy state of affairs is due entirely to the vaccination programme carried out during the first two or three years, it is reasonable to assume that it is very largely responsible for the definite reduction in cases. These statistics, plus the fact that the administration of the vaccine was attended with a minimum of unpleasant reactions or complications, will perhaps, do much to convince those who still have any doubts regarding the efficiency of the vaccination as a preventive measure that it is very much in their interests to avail themselves of the protection offered against this disease.

Vaccination sessions continued to be held at 8, Cleveland Place East, Bath, for the Bathavon area, "Hazelwood" Day Nursery, Keynsham, for the Keynsham area and the County Clinic, Cork Street, Frome, for the Frome area.

SONNE DYSENTERY

Ten notifications of sonne dysentery were received from different parts of the area. The fact that there was no further spread from these cases was no doubt due in large measure to the prompt action on the part of the public health inspectors in investigating each individual case.

PUERPERAL PYREXIA

As last year one case of puerperal pyrexia was notified.

DEATHS UNDER ONE YEAR OF AGE ALL AREAS

	<i>Under 1 week</i>	<i>1-4 weeks</i>	<i>1-6 months</i>	<i>6-12 months</i>	<i>Total</i>
Atelectasis	2	—	—	—	2
Asphyxial hæmorrhage	1	—	—	—	1
Hydrocephalus	—	1	1	—	2
Nephritis	—	—	1	—	1
Intracranial hæmorrhage	5	—	—	—	5
Prematurity	5	—	—	—	5
Paralytic ileus	—	—	1	—	1
Hæmorrhagic disease	1	—	—	—	1
Pneumonia	—	—	1	—	1

Myocardial failure	—	—	1	—	1
Congenital abnormality	—	1	—	—	1
	15	2	5	—	22

STATISTICAL TABLE

The figures in this Table represent the birth rates, death rates and infantile mortality rates for the combined districts for the six years period 1954-1959 with the comparative figures for England and Wales.

		<i>Birth rate</i>	<i>Death rate</i>	<i>Infantile rate</i>
Combined districts	1954	17.39	10.91	24.91
England and Wales	1954	15.2	11.3	25.5
Combined districts	1955	16.68	10.79	15.33
England and Wales	1955	15.0	11.7	24.9
Combined districts	1956	16.83	9.45	18.54
England and Wales	1956	15.7	11.7	23.8
Combined districts	1957	17.72	9.66	11.21
England and Wales	1957	16.1	11.5	23.0
Combined districts	1958	17.95	10.78	25.70
England and Wales	1958	16.4	11.7	22.5
Combined districts	1959	17.07	9.67	22.22
England and Wales	1959	16.5	11.6	22.0

The birth and death rates both showed a reduction and each bore favourable comparison with the rates of England and Wales. The infantile mortality rate was reduced but is still high for the area. At 22.22 it was just above the figure of 22.0 for England and Wales. The causes of death showed no marked deviation from those of previous years.

BATHAVON RURAL DISTRICT COUNCIL

POPULATION ESTIMATED MID-YEAR, 1959	19,810
AREA OF THE DISTRICT	39,996 acres

REPORT OF THE PUBLIC HEALTH INSPECTOR

WATER SUPPLIES

The only supplies now under the jurisdiction of the Council are the Combe Hay scheme, which serves the parishes of Combe Hay, Peasedown St. John, Wellow, Shoscombe, Camerton, Dunkerton and Priston, the Marksbury Village Supply and the small supplies serving the hamlet of Swineford.

The Marksbury supply was obtained in bulk from the Clutton Rural District Council.

The dry summer caused some small curtailment of the Combe Hay Scheme during the night hours otherwise the supplies were maintained without interruption.

The quality of the water both before and after chlorination was satisfactory.

Negotiations are at present proceeding for the transfer of the above supplies to a Statutory Undertaker.

Supplies from Statutory Authorities:

The Bath Corporation and the West Gloucester Water Company (now part of the Bristol Waterworks Co. Ltd.), are the only statutory water undertakers supplying in the District.

Pure supplies of water were maintained by them throughout their statutory area within this district.

Private Supplies:

The only parishes still relying on privately owned supplies are Claverton and Kelston. No difficulties were experienced at Kelston but the Claverton supply is somewhat unsatisfactory and consideration will have to be given to extending public mains to this village.

Results of Samples Taken:

<i>Chlorinated Water Bacteriological</i>		<i>Chemical</i>		<i>Bacteriological</i>	
<i>Satisfactory</i>	<i>Unsatisfactory</i>	<i>Satisfactory</i>	<i>Unsatisfactory</i>	<i>Satisfactory</i>	<i>Unsatisfactory</i>
14	—	2	—	5	7

Water Distribution:

Number of Parishes supplied from public mains	24
" " " " " private estate sources			2
" " Houses having water directly laid on	6,004
" " " served by standpipes	192
" " " relying on wells	81
" " " " spring supplies	73

SEWAGE DISPOSAL

The twenty-six Parishes within the Rural District all have public sewers in the more populated areas with the exception of Marksbury, Newton St. Loe, Corston, Northstoke, Englishcombe, Compton Dando, Dunkerton, Charlcombe and St. Catherines. The Council are about to go to tender for a sewerage and sewage disposal scheme for the parishes of Corston and Newton St. Loe and have given instructions for a sewerage and sewage disposal scheme to be prepared for the village of Marksbury. All sewage disposal works have been working satisfactorily with the exception of the old works serving Wellow Village for which a reconstruction scheme is at present being prepared.

At the time of writing the scheme for Freshford and North and South Peasedown has virtually been completed.

Apart from new schemes no sewers were extended during the year.

PUBLIC CLEANSING

A fortnightly collection of house refuse together with a small quantity of trade waste was carried out satisfactorily. Nineteen men and six covered lorries are directly employed on the work and the refuse is disposed of at four tips where it is covered with ashes and pit waste.

Arrangements and re-organisation of rounds are being made so that a weekly collection can be carried out during the coming year.

HOUSING

Number of dwelling houses in the district	6,337
" " " owned by the Council	1,093
" temporary dwellings (huts, prefabs, etc.)	Nil
" houses listed as unfit for habitation and for	
action individually or by clearance orders	57
" houses demolished or closed under the Housing	
Act, 1957	13
" houses made fit in all respects	15

Houses built during the year:

By private enterprise	46
By the Council	23

Improvement Grants made under the Housing Act 1949-1954:

Discretionary:

Number of applications approved	58
" " " rejected	2
Average cost per dwelling approved	£212 13s. 10d.	
Amount of grant payable by Local Authority	£3,084	

Standard:

Number of applications received and approved	27
--	-----	-----	----

Rent Act, 1957:

CERTIFICATES OF DISREPAIR:—

Number of applications received	4
" Certificates issued	2

FOODS

Milk:

Number of registered distributors	35
" " dairy premises	20
" licensed dealers of designated milks	35
" supplementary licences issued to distributors	
whose dairy is outside the district	15

As regards sampling this authority concentrates on the milk handled and bottled in the dairies within the district. The County Council sample from the dairies and producers who are licensed by them and from those who serve Schools, Canteens and other County Council establishments. The adjacent authorities sample the milk from the larger dairies which are situated in their districts.

The results of the samples taken show that the purity, cleanliness and keeping quality of the various designated milks have reached a very high standard.

Ice-Cream:

There are sixty-one registrations for the retailing of ice-cream. In each case it is pre-packed and supplied by the well known manufacturers who in most cases supply containers for storage.

Results of samples taken from each of the wholesalers' products were classified Grade 1.

Meat and Other Foods:

There are no slaughter houses or bacon factories in use at the present time. During visits to shops, canteens and cafes, the following foods were examined and were surrendered as being unfit for human consumption:—

31 lbs of Beef	52 Tins of Fruits
15 Tins of Meat Products	11 Tins of Fish
9 Tins of Condensed Milk	18 Tins of Vegetables

Food Hygiene Regulations 1955:

There are 113 premises which are controlled by these regulations, forty-one of which being premises where food is prepared.

Six notices under the above regulations for minor infringements were served and complied with.

All the occupiers have complied with the regulations as regards the essentials but it is found to be necessary to make visits from time to time to remind existing, as well as new, personnel of the requirements laid down for maintaining cleanliness at all times.

CLEAN AIR ACT, 1956

The byelaw made under Section 24 of this Act and Section 61 of the Public Health Act 1936 in respect of the provision of appliances designed for burning smokeless fuels in new buildings was complied with and no action was necessary. Informal action taken under the Act resulted in a contravention of the Act by a Factory being abated.

CARAVANS

Number of individually licensed caravans	25
„ licensed caravan sites	7
„ caravans on licensed sites	94

Negotiations are proceeding for improvements in facilities at two of the licensed sites. These entail additional water points and conveniences.

There were no difficulties or need for action at any of the individually sited caravans.

RODENT CONTROL

During the year 635 inspections were made in dealing with 194 cases of infestation. Seventy-three of these cases were major infestations.

The Council will, during the coming year, commence a contract service whereby owners of business premises and farmers will be able to have constant treatment of their premises on a yearly basis. The charge will be based upon the size of the premises, the number of treatment points and the estimated time to be spent by the operator.

INDUSTRIES

Inspections of Factories and Workplaces:

	<i>Number</i>	<i>Inspections</i>	<i>Notices</i>
1. Factories in which Secs. 1, 2, 3, 4 and 6 of Factories Act are enforced ...	30	22	Nil
2. Factories in which Sec. 7 is enforced	10	8	3

These notices referred to toilet facilities, in each case of which the request was complied with.

No action was necessary in respect of any of the seventeen Outworkers. They are engaged in the making of Gloves.

CLOSEST ACCOMMODATION

Number of water closets in area	7,130 (Approx.)
„ pail closets „	1,125
„ chemical closets „	102
„ conversions of water closets	34

NUISANCES

Enquiries and visits in connection with various nuisances ...	132
Nuisances remedied following formal and informal action	41

DISINFECTION AND DISINFESTATION

Enquiries and visits in connection with cases of infectious disease	58
Disinfections carried out	25
Disinfestations carried out	11

Disease of Animals (Waste Foods) Order 1957:

The sixteen licence holders under the above Order complied with the regulations throughout the year.

The sterilisation plants consist of four of the steam injection type, five pressure cookers and seven coppers. All the plants are in working condition and precautions have been taken, in each case, to prevent the mixing of boiled with the raw foods.

Two informal notices concerning improvements to flooring were issued and have been complied with.

VARIOUS

There is one Rag Flock manufacturer licensed under the Rag Flock and other Materials Act, 1957. The samples submitted have all reached the required standard of purity and no action has been necessary.

There is one Knacker's Yard in operation which is also licensed to slaughter horses. Alterations to the premises have been made in order that the provisions of the Slaughter of Animals (Prevention of Cruelty) Regulations 1958 are complied with. Licensed Slaughtermen are available at all times and the general running and state of the premises have been satisfactory.

There are seven dealers in old metals registered under the Public Health Amendment Act, 1907.

There are no public swimming pools and no pet shops in the district.

APPENDIX

FACTORIES ACTS, 1937-1959

KEYNSHAM WELFARE CENTRE

A successful year's working at the Keynsham Welfare Centre was reflected in the attendance figures which showed a definite increase on those of the previous year. The general committee which administers this Centre consists of ten members and includes a W.V.S. worker who is in control of the sale of Welfare Foods, a representative of the Red Cross Society, a representative of the Health Committee of the Keynsham Urban District Council, a member of the Saltford Centre and helpers who attend the Charlton Road and Park Estate Centres. The secretary, Mrs. Smallwood, reported that the committee had received with great regret the resignation of Miss Talbot who had had to relinquish the post of assistant treasurer because of ill health, and also that of Mrs. Marjorie Hickling who did such valuable work in establishing the Centre. Forty-six sessions were held in Charlton Road during 1959, the Centre being closed during August and the last two weeks in December. The Park Estate Centre was open for twenty-two sessions. As a result of the increased attendances at the Park Estate Centre it was considered advisable to hold one doctor's session there each month beginning October 2nd, 1959. The necessary arrangements were made and Dr. Munro was appointed Medical Officer.

The attendance figures for the year were as follows:—

Keynsham Infant Welfare Centre:

January	155
February	162
March	179
April	190
May	209
June	183
July	185
August	...	Closed	
September	198
October	167
November	170
December	130

Attendances for 1958	638
----------------------	-----	-----	-----	-----

KEYNSHAM DAY NURSERY

The Day Nursery continued to serve the area well during the year and the general health of the children maintained its usual high level. Very little absence was caused by infectious disease and none by major illness.

The number of children on the register increased from twenty-eight to thirty (four under two, twenty-six in the two to five years group) and the daily attendances from twenty-four to twenty-five.

I was again indebted to Mr. Amos, the County dental officer, for the use of his rooms to hold poliomyelitis vaccination sessions and to Mrs. Rimmington, the matron of the Day Nursery, for so willingly making it possible for me to have the sessions at the nursery. My thanks are due to her both for arranging the times of the session and for the able way with which she coped single handed with the children, no matter how vast the numbers.

ANNUAL REPORT OF THE PUBLIC HEALTH INSPECTOR FOR 1959

PUBLIC CLEANSING

A weekly collection of house and trade refuse from all premises in the district has been maintained. All the work was carried out by direct labour for which two vehicles and eight men were employed. Over 4,500 calls were made each week and by comparison the number of complaints received were very few.

All refuse has been disposed of at the controlled tip at Unity Road without difficulty.

HOUSING

The rate of completion of new houses, both Council and private, has been maintained at about the same level as for 1958. A most pleasing feature of the current programme was the start of the scheme to cater especially for the needs of older persons.

The total number of applicants for Council Houses at the end of the year was 224—five less than twelve months ago.

Housing Statistics:

1. Total number of dwelling houses in district	4,489
2. Total number of dwelling houses owned by Council	...	1,440	
3. New houses completed during the year:			
(a) By Local Authority	73
(b) By Private Enterprise	85
4. Houses demolished or closed	6
5. Summary of action under Housing Acts:			
(a) Houses inspected	94
(b) Total number of visits	132
(c) Informal notices issued	16
(d) Informal notices complied with	16
(e) Statutory notices issued	—
(f) Statutory notices complied with (issued in 1958)	...	1	

Housing Act—Improvement Grants:

(a) Discretionary Grants:

Number of applications and houses dealt with during year:—

<i>Received</i>		<i>Approved</i>	
<i>Applications</i>	<i>No. of dwellings</i>	<i>Applications</i>	<i>No. of dwellings</i>
10	14	8	12

The average approved cost per dwelling ... £473

Total amount of grants payable ... £2,363

(b) Standard Grants:

Number of applications (a) received—4, and (b) approved—4.

PUBLIC HEALTH INSPECTIONS

Total number of inspections	382
Informal notices issued	10
Informal notices complied with	10
Infectious diseases	} Enquiries	...	11
		Disinfections	...
Enquiries into insect infestation	40
Shop inspections	56
Statutory notices issued	1
Statutory notices complied with	1

INSPECTION AND SUPERVISION OF FOOD

(a) Total number of food premises in area 74.

These comprise:	(i) Retail butchers	8
	(ii) Other retail food shops	42
	(iii) Cafes and canteens (including schools)	16
	(iv) Bakehouses	3
	(v) Chocolate manufacture	1
	(vi) Ice-cream manufacture	1
	(vii) Pickle manufacture	1
	(viii) Wholesale warehouse	1
	(ix) Sugar packing	1

(b) Total number of premises registered under Section 16 of the Food and Drugs Act, 1955, 50.

These comprise:	(i) Ice-cream manufacture	1
	(ii) Ice-cream manufacture and sale	1
	(iii) Ice-cream storage and sale	39
	(iv) Sausage manufacture	6
	(v) Preserved food manufacture	3

There are no licensed slaughterhouses or knackers' yards within the Urban District.

(c) Total inspections at all types of food premises 160.

Food surrendered as unfit for human consumption:—

Meat and Meat Products	...	70 lbs.
Tinned fruit and vegetables	...	114 tins
Tinned meat	25 tins
Tinned milk	8 tins
Tinned fish	12 tins
Miscellaneous	15 tins

All condemned food was removed for disposal at the refuse tip.

(d) Milk Supply:

All milk sold in the area is designated milk and has been maintained at a uniformly satisfactory standard.

Total number of samples submitted for bacteriological examination 50.

These comprise:	Tuberculin Tested	...	4
	Pasteurised	34
	Sterilised	12

All of which conformed to prescribed standard.

(1) Number of registered dairy premises	2
(2) Number of registered distributors	9
(3) Number of dealers' licences to retail pasteurised milk	2
(4) Number of dealers' licences to retail T.T. milk	2
(5) Number of supplementary licences to retail pasteurised milk	4
(6) Number of supplementary licences to retail sterilised milk	2
(7) Number of inspections at dairies, etc.	28

(e) Bakehouses:

The three bakehouses have been periodically inspected and found in a clean and satisfactory condition. One of these closed down during the year.

(f) Food Manufacturing Premises:

There has been no change in the premises registered under this head during the year. The premises in use have been inspected from time to time and found to be well maintained and operated.

(g) Ice-cream:

Six new premises have been registered for the sale of ice-cream during the year. It has, however, been noted, in the course of routine visits that at a number of shops on the register, the business has been discontinued. Therefore, despite new registrations, the effective number has not materially increased. In all cases the ice-cream retailed is produced and packed by the large wholesale manufacturers, and as indicated by the results of samples taken, a very satisfactory standard maintained.

In all thirty samples of ice-cream were taken with the following results:—

Grade 1—26; Grade 2—3; Grade 3—1; Grade 4—0.

(h) Food Hygiene Regulations:

No formal action has been necessary under the provisions of these Regulations as food premises generally have been satisfactorily maintained.

The mobile trader is still the greatest problem as it is so difficult to maintain adequate supervision. The genuine trader provides an essential service, but so often vans are operated by completely untrained and incompetent people whose only concern is the maximum return for the minimum capital outlay and the provision of hygienic conditions is often the last consideration.

WATER SUPPLY

Rainfall:

<i>Month</i>	<i>Somerdale Station (Total depth in inches)</i>	<i>Greatest Fall in 24 hours</i>	<i>Date</i>
January	3.42	0.67	1st
February	0.25	0.24	9th
March	3.04	0.58	4th
April	2.29	0.55	16th
May	1.03	0.25	12th
June	2.54	1.60	25th
July	2.37	0.90	27th
August	2.60	0.96	9th & 10th
September	0.09	0.09	21st
October	3.17	1.34	26th
November	3.75	0.91	13th
December	6.48	0.71	7th
TOTAL:	31.03	—	—

During the year the Water supply undertaking has been taken over by the Bristol Waterworks Co. and practically all domestic supplies are obtained from the Company mains. The quality and quantity of this supply have been satisfactory.

Samples of the water have been taken quarterly for bacteriological examination and all have been satisfactory. Chemical analyses indicate that the water is moderately soft and slightly alkaline.

RODENT CONTROL

Total number of visits of inspection	...	976
Number of properties found infested	...	40
Treatments carried out by operator	...	23

In addition to the above all Council properties have been kept under observation and treatments carried out as necessary.

While it is unlikely that a complete clearance of all rodents will ever be achieved, it is true that no major infestation has been recorded for several years, and the number of minor cases has been very small. This is a very satisfactory situation due in no small measure to the continuous effort and enthusiasm of the Operator.

CARAVAN SITES

Licences have been granted for six caravan sites which together provide accommodation for eighty-eight caravans. All sites were satisfactorily equipped and maintained.

FACTORIES ACT 1937

There has been little change during the year in the premises registered under the Factories Act 1937 except that part relating to sites of building and engineering construction. Six premises have been closed or adapted for other uses.

There are no outworkers.

APPENDIX

FACTORIES ACTS, 1937 TO 1959

Prescribed Particulars on the Administration of the Factories Act, 1937

PART I OF THE ACT

1. INSPECTIONS for purposes of provisions as to health (including inspections made by Public Health Inspectors).

FROME WELFARE CENTRE

For the third year in succession the number of children on the register at the end of the year was less than that for the previous year, 365 to 330, and the attendance figures were, therefore, also reduced from 2,216 to 1,905.

This state of affairs is not likely to continue, however, as an infant visitor was appointed for the Frome area towards the end of the year. This was immediately followed by increased clinic attendances by the mothers particularly at the parentcraft session.

The totals for the year were as follows:—

Total on the register at the beginning of the year	365
Total on the register at the end of the year	... 330

Attendances:—

January	170
February	164
March	117
April	158
May	151
June	143
July	188
August	141
September	169
October	185
November	156
December	163
			1,905

Attendances for 1958 2,216

**REPORT OF THE CHIEF PUBLIC HEALTH
OFFICER FOR 1959**

Housing:

The number of applicants on the Council's Housing List is now ninety-one. During the year one hundred and forty-nine Council Houses were erected for Slum Clearance purposes. Forty-seven houses were also built by private enterprise builders. There were twenty-three houses in course of erection at the end of the year by private builders.

The number of houses demolished or closed under Section 17 of the Housing Act, 1957—twelve. The number of houses made fit during the year—fifty-nine.

The whole of the Broadway, Vallis Way, Horton Street Redevelopment Scheme was completed and the houses occupied before the end of the year. This estate was officially opened by the Principal Parliamentary Secretary to the Minister of Housing and Local Government, Sir Keith Joseph, on the 7th January, 1960.

PUBLIC HEALTH INSPECTION OF THE DISTRICT

During the year the following numbers of visits were made—

Public Health Inspections including Meat and Food Inspections	1,959
Housing	943
Total number of visits of all kinds	4,140

Common Lodging Houses:

Two Common Lodging Houses were visited on three occasions. They were both kept in a satisfactory and clean condition.

Rodent Control:

Two sewer treatments have been carried out during the year satisfactorily. The Rodent Operator continues on a full-time basis. The present Operator is retiring in 1960 and a new Operator has been appointed. This full-time service continues to be most satisfactory.

**MILK SUPPLY, INSPECTION AND SUPERVISION
OF FOOD**

Number of registered distributors of milk	4
Number of registered dairy premises other than farms	2
Number of licensed dealers of Designated Milk	6
Number of supplementary licences issued to distributors with dairies outside the Urban District	1

During the year ninety-three samples of Designated Milk were taken for bacteriological examination and all were satisfactory.

Ice-Cream:

There are forty-five registered premises in the district. During the year fifty-five samples were sent to the Public Health Laboratory at Bath and the results of tests were as follows:—

Grade 1	54 samples
Grade 2	1 sample

MEAT INSPECTION

Carcases and offal inspected and condemned in whole or in part during the year:—

	<i>Cattle Excluding Cows</i>	<i>Cows</i>	<i>Calves</i>	<i>Sheep and Lambs</i>	<i>Pigs</i>
Number killed	525	120	97	1,084	7,772
Number inspected	Same	as number	killed		
All Diseases Except Tuberculosis and Cysticerci:

Total (in lbs) condemned	1,569	5,706	1,722	639	8,319

Food Hygiene Regulations 1955:

During the year fifty-one premises were visited. The application of these Regulations has resulted in a considerable improvement in all food premises and this improvement is only maintained by the regular inspection of such establishments.

Water Supply:

The water supply gave every satisfaction during the extremely dry year and no restrictions of any kind had to be placed on its use. At the end of the year there was evidence of a certain amount of contamination at the old well, but this has been dealt with and samples taken continue to be satisfactory.

Number of samples taken	29
Number of satisfactory samples	27

Factories Act, 1937 and 1959:

There were eighty-eight factories on the Council's Register as at 31st December, 1959. Visits were made to twenty-one factories. No Statutory action was necessary.

Other Food Inspections:

REPORT OF THE CHIEF PUBLIC HEALTH INSPECTOR WATER SUPPLIES

All public water supplies were sampled for bacteriological examination and chemical analysis: private supplies for bacteriological examination only.

<i>Raw Water</i>				<i>Treated Before Going Into Supply</i>			
<i>Bacteriological</i>		<i>Chemical</i>		<i>Bacteriological</i>		<i>Chemical</i>	
<i>Satis- factory</i>	<i>Unsatis- factory</i>	<i>Satis- factory</i>	<i>Unsatis- factory</i>	<i>Satis- factory</i>	<i>Unsatis- factory</i>	<i>Satis- factory</i>	<i>Unsatis- factory</i>
25	24	7	1	32	6	1	Nil

PUBLIC SUPPLIES

(a) Norton St. Philip:

The yield of the well at Norton St. Philip is more than sufficient to supply the parishes of Beckington (except the hamlet of Rudge), part of Woolverton, Norton St. Philip and part of the parish of Hemington. The water is chlorinated and the quality has proved satisfactory throughout the year.

(b) North East Area:

The hamlet of Rudge and the parish of Rode are now supplied with water purchased in bulk from Trowbridge and Melksham Water Board. The supply at all times has been satisfactory as regards quality and quantity. The Water Board are under contract to supply 80,000 gallons per day, and during the last year the average daily consumption has been 35,000 gallons.

(c) Gaer Hill:

Owing to the increased consumption of water in the parishes of Nunney and Trudoxhill the Council have decided to augment the supply to Nunney by extending the water main from Wanstrow. This work is to be carried out during 1960.

(d) Mells:

Mells is no longer supplied from the Bilbao Reservoir or the Conduit Springs. The old Mells water mains have now been connected up with the West Regional Stage II supply (Tadhill Reservoir).

(e) Buckland Dinham:

The Buckland springs now supply the upper half of the village only and here again the remaining part of Buckland receives its water from the West Regional Stage II supply.

(f) Leigh on Mendip:

The spring which originally supplied this village has now been abandoned, and the old village mains have been connected up with the West Regional Stage II scheme.

(g) Improvements During the Year:

(1) Cloford

The water main at Wanstrow has been extended to the hamlet of Cloford and it is anticipated that main water will be available to this hamlet in 1960.

(2) East Woodlands

The extension of 500 yards of water main to supply those properties near the Church in East Woodlands was completed during the year.

(h) Future Extensions:

(1) Laverton

The scheme for the supply of main water to the village of Laverton has been finally approved and it is anticipated that this work will be carried out in the Spring of 1960.

(2) Kilmersdon

The scheme has been approved for the extension of 600 yards of water main from Kilmersdon village to supply that area of the parish in the vicinity of the School. This extension will be carried out in 1960.

SEWERAGE AND SEWAGE DISPOSAL

(a)

The following parishes have satisfactory main drainage and efficient disposal systems:—

- (1) COLEFORD, (2) RODE, (3) KILMERSDON,
(4) BECKINGTON, (5) MELLS.

(b) Norton St. Philip:

It is very disappointing to have to report that the main drainage and disposal system for the above has not yet even reached the "Tendering Stage". This is entirely as a result of a new Broiler Factory being erected within the parish. The drainage from the Broiler Factory will enter the village sewers and I understand that the Consultants are now preparing the final details of the revised scheme. It is anticipated that this scheme will be commenced by the end of next year.

(c) Further Proposals:

The Council's Consultants have been instructed to prepare a scheme for the main drainage of the parishes of Nunney, Wanstrow and Leigh, and it is hoped that all these schemes will be under construction by the Spring of 1961.

When the aforementioned have been carried out the Council have decided that Faulkland, Buckland Dinham, Witham Friary and Trudoxhill are the next parishes to be provided with this necessary amenity.

REFUSE COLLECTION

The collection of household refuse is still carried out by contract at fortnightly intervals, except in the parish of Coleford where there is a weekly collection. This method of collection has proved most unsatisfactory, numerous complaints having been continually received from householders in isolated parts of the area.

The Council have agreed that as from April 1st, 1961, household refuse in the area will be collected by their own workmen and their own vehicle.

HOUSING

	<i>Houses Erected During Year</i>		<i>Houses in Course of Erection</i>	
	<i>For Slum Clearance</i>	<i>For Other Purposes</i>	<i>For Slum Clearance</i>	<i>For Other Purposes</i>
Local Authority	16	Nil	30	Nil
Private Enterprise	—	26	Nil	11

<i>Number of Post-War Houses erected from 1st April 1945, to 31st December, 1959</i>		<i>Housing Programme for 1960</i>	
<i>By Local Authority</i>	<i>By Private Enterprise</i>	<i>For Slum Clearance</i>	<i>For other Purposes</i>
345	199	Not yet fixed by Council	Nil

During the year twenty houses have been demolished or closed under Section 17 of the Housing Act, 1957.

Many tenants living in houses on which Demolition Orders have been made find alternative accommodation before the council houses erected for them have been completed. This means that the Council loses its house subsidy. This is bound to have serious repercussions in the future.

Improvement Grants

(a) Discretionary:

Number of applications and houses dealt with by Local Authority during the year:—

<i>(1) Received</i>		<i>(2) Approved</i>	
<i>Applications</i>	<i>No. of Dwellings</i>	<i>Applications</i>	<i>No. of Dwellings</i>
41	61	37	57

Of this number nineteen are owner/occupiers. During the last year it is very gratifying to note that owners of many of the poorer types of cottages are now applying for Discretionary Grants, and I am glad to say that the Council is giving favourable consideration to such applicants.

(b) Standard Grants:

During the year Standard Grant applications were received from forty-one owners in respect of forty-one houses for the above Grant. These were approved by the Council.

MILK

Number of Registered Distributors	22
„ Registered Dairy Premises (other than Dairy Farms)	7
„ Licensed Dealers of Designated Milk	2
„ Supplementary licences issued to distributors whose dairies are outside the area	8

DESIGNATED MILK SAMPLING

<i>Designation</i>	<i>Samples Taken</i>	<i>Satisfactory</i>	<i>Unsatisfactory</i>
Tuberculin Tested	10	10	Nil
Pasteurised ...	Nil	—	—
Sterilised ...	Nil	—	—

ICE-CREAM

Number of premises registered for:—

(a) Manufacture and retail	Nil
(b) Manufacture only	Nil
(c) Retail only	26

FOOD HYGIENE REGULATIONS 1955

During the year the following action has been taken under the above regulations:—

Number of Premises inspected	13
„ Notices served	5
„ Certificates of Exemption issued	2
„ previous year's notices completed satisfactorily	17

KNACKER'S YARD

There is one Knacker's Yard in the area and during the year reconstruction of the drainage system was carried out. The drainage from the above premises, after treatment on the site, is discharged into the Frome Urban District Council's sewer.

FACTORIES

Inspection of all the factories in the area has been carried out and no official action has been necessary.

INDUSTRIES

The commercial life of the district is principally centred around the following industries:—

Agriculture	Engineering
Quarrying	Milk Products

PEST DESTRUCTION

The sewers and refuse tips within the area are being treated regularly. Domestic premises have been inspected and where necessary treatment of the infested premises has been carried out.

APPENDIX
